

CREATING AND UPDATING LIBRARY ITEMS

In this location (L:\Programs\Illustrators\Tim Russell\Program\Library Window) the main library folders that we currently have are displayed below.

For the library items that we have created we just create an IDR file titled for the items we are wanting to add or if a file exists for the items you want to add you would just open the existing IDR. Allen Head Screws.idr shown below.

To add an item you simply add the item to the file remove any existing grouping on the added item.

Then regroup it and save. (Make sure that the item uses a standard line weight)

Once Isodraw is restarted your item should be in the library

- 7 Allen Head Screws.idr
- 7 Bolts.idr
- 7 Change Hands.idr
- 7 Clamps.idr
- 7 Collar and Collar Pin.idr
- 7 Electrical Connectors.idr
- 7 Flat Head Screws.idr
